

Digital Excellence in Motion.

Your reliable partner for sophisticated software, complex data, and mobile applications.

ABOUT US / PHILOSOPHY

Partners at Eye Level – For Over 20 Years.

Behind every successful digital project is a team that speaks your language. We are your experienced, well-established software development team, standing by your side for sophisticated online applications, challenging data projects, and custom mobile apps.

For more than two decades, we have been working across industries, remaining independent and future-oriented. Our greatest strength? **We listen.** We place the highest value on deeply understanding your unique requirements and business goals. This is the only way to build the best possible technological solution for your success.

Shaping the Future – With Pragmatic AI

The digital world is evolving rapidly, and artificial intelligence is unlocking entirely new possibilities. We are actively embracing this path. Instead of chasing short-lived tech hypes, we evaluate and integrate new AI approaches pragmatically, ensuring they deliver genuine, practical business value for your company.

Our promise to you: We are not just a service provider; we are your reliable, long-term partner. From the initial spark of an idea to long-term operations, we stand firmly by your side.

OUR SERVICES

From Analysis to Support: Everything from a Single Source.

A project can only become perfect if the foundation is solid. That is why we accompany you through the entire lifecycle of your software:

- **In-Depth Conception:** With precise AS-IS/TO-BE analyses during the conceptual phase, we ensure your project is flawlessly set up from a functional and technical standpoint right from the start.

- **Pragmatic Development:** We build high-performance, secure, and scalable applications that integrate seamlessly into your existing workflows.
- **Long-Term Care:** We don't leave you hanging after launch. We secure the long-term success of your solutions through professional software maintenance and tailored Level 2/3 support—fully customized to your needs.

AUTOMOTIVE FOCUS

Industry Expertise That Puts You in the Fast Lane.

While we operate with technological independence, our heart beats particularly strong for the **automotive industry**. Here, we combine IT excellence with deep, long-standing insider knowledge.

Our Expertise in the Automotive Sector:

- **Deep Vehicle Data Know-How:** We excel at handling OEM data, specification data, complex buildability logics, as well as precise residual value and forecasting models.
- **Seamless System Integration:** We possess detailed knowledge of the VIN query systems used by almost all major manufacturers.
- **Connected Vehicle Trading:** We know automotive sales processes inside out. We seamlessly connect DMS systems as well as major vehicle marketplaces and services (e.g., mobile.de, autoscout24, Twinner, GDV).
- **International Scaling:** Benefit from our extensive experience in worldwide projects and multi-tenant, enterprise-level solutions.
- **AI-Powered Data Workflows:** We integrate initial, intelligent AI applications to analyse complex vehicle data even more efficiently, refine forecasting models, and automate trading processes.

TECHNOLOGICAL FOUNDATION

State-of-the-Art Technology for Maximum Stability.

Complex requirements demand a robust architecture. Our tech stack and development methodologies are designed for premium quality, fault tolerance, and future-proof reliability.

Software Development & Apps

- **Backend & OS:** High-performance solutions powered by PHP on stable Linux platforms.
- **Frontend:** Modern, responsive interfaces built with Angular, TypeScript, Bootstrap, HTML5, and CSS.
- **Mobile Apps:** Native performance for iOS and Android from a single codebase using Flutter and Dart.
- **Interfaces:** Custom development and seamless integration of RESTful APIs and SOAP services.

Data & Cloud Infrastructure

- **Big Data & Databases:** Specialized in MySQL/MariaDB and INFORMIX. We handle complex data models, data-heavy migration projects, and targeted performance tuning of your database instances.
- **Cloud Hosting & Operations:** Secure operation of proprietary and client-specific systems in the cloud. Infrastructure-as-Code (Terraform, Ansible) ensures rapid, error-free deployments.
- **SaaS Proprietary Solution:** With **PDFrePRO**, we offer our clients an in-house, established cloud service for automated PDF layouting and high-speed generation.

Quality Assurance, DevOps & AI Innovation

- **Automated Quality:** Unit testing, coding standards, and browser End-to-End (E2E) testing guarantee bug-free code.
- **Modern Workflows:** Docker/Vagrant environments, Git version control, and efficient project management.
- **24/7 Monitoring:** Proactive monitoring via Zabbix combined with smart, instant alerting through SIGNAL4 for maximum system availability.
- **Pragmatic AI Integration & Prototyping:** Connecting modern AI interfaces (APIs) and LLM services into web and mobile apps for data validation, automation, or smart search. We build rapid Proof-of-Concepts (PoCs) to safely test AI potential in your business.
